PRE-ANESTHETIC AND SURGICAL RELEASE FORM FOR EXOTICS
Please Read Carefully and Sign

Client Name: _____ Date: _____

Pet's Name: _____ Procedure: _____

I, the undersigned owner, hereby authorize any emergency medical or surgical treatment deemed necessary for the health and well being of my pet _____ during its stay at the Dr. Michael Hutchinson D.V.M., P.C. facility. Our doctors use safe anesthetic and surgical protocols to minimize risk to your pet. No anesthetic or surgical procedure is completely without risk. Although modern veterinary anesthetics are generally considered safe, problems can still occur. Complications from an anesthetic may range from mild nausea to prolonged recovery due to an organ problem (kidney or liver), to very rarely, death. If your exotic pet has been fasted we cannot perform surgery at this time.

Please indicate if you would like us to perform any of these additional services
Please check one box in each category

Post-Operative Pain Control:

Pain control can greatly improve both comfort and healing during the post-operative recovery period. Pain management ranges from in hospital injections and/or oral medication to send home with the patient.

Additional fee does apply.

- Pain Injection – lasts 24 hours
 Oral Pain Medication to go home
 Both an injection and oral pain medications

Fluid Therapy:

These allow us to maintain blood pressure, replace blood loss, and speed recovery. These options are recommended for all pets undergoing general anesthesia. *Additional fee applies.*

- Yes, I accept fluid therapy for my pet.
 I decline fluid therapy for my pet.

I understand the risks associated with general anesthesia and agree to pay the fees for the service above.
